the COMPLETE Process

POLYMER
STAMP MAKING MACHINE

Step 1

Typeset your stamp
on the computer using
CorelDraw®, Adobe®
Pagemaker®,
Microsoft® Word®, etc.

Step 2

Take a reverse print
out (NEGATIVE) from
any Laser Printer or
Inkjet Printer. Use
Novadense to enhance
density if required.

Step 3

Setup the Imagepac
Sachet on the Imagepac
machine and expose as
specified. There after
washout and post expose
as per manual.

Step 4

Cut out the
individual
stamp from
the plate.

Step 5

Paste the Polymer
Stereo on the relevant
Self-Inking Stamp or
Hand Stamp Holder.
